Worldwide, six young people between ages 18-23 are infected with HIV in every minute. Being young doesn't make you immune.

STDs in Singapore have increased dramatically in the past five years. The number of women infected, 3,600, was up by more than 150 percent from the year 2000. Among women ages 20-24, 1,111 cases were diagnosed last year, up from 376 in 2000. **GET THE FACTS!**
